

TMR2-2 Day Transport Manager Refresher Training

Duration: 2 days

Drivers CPC Upload Not Available

Purpose:

The Institute's Transport Manager Refresher (TMR) training course is a two-day course available to currently qualified Transport Managers, that is holders of a Transport Manager Certificate of Professional Competence.

Many Transport Managers fail to undertake any formal refresher training after passing their Certificate of Professional Competence (CPC) Examinations, in some cases, this can be in excess of twenty years, during which time an organisation can fall behind with legislative changes and best practice that may put the Operators Licence at risk. This course is designed to give the operator and the transport manager an ability to develop policies and operational procedures to ensure compliance.

Companies which find themselves in front of a Traffic Commissioner (TC) at a Public Inquiry (PI) often find that attending update training is a condition required to allow continuation of the 'O' Licence even if the CPC was passed very recently.

The Institute course complies fully with the expectations of the Traffic Commissioners.

Course Content

- Operator Licensing – Application; Conditions; Notifiable Changes; Legal Responsibilities
- Safe Loading of Vehicles – including Load Restraint, calculation of payload and safe load distribution
